

Data from six measurement sites located in French Guiana are used for GHI prediction. Five years of data from the six stations were used for the learning phase and one year for the validation phase. Population growth and continuous demand for energy production have prompted electricity producers to focus increasingly on the use of local and ...

Our GPM SCADA system sets the benchmark for solar plant monitoring and management, outclassing all competitors. Its unmatched power and reliability make it the industry standard, setting a bar that others strive to reach but cannot surpass.

The OneView ® Portfolio SCADA combines each specific site's Park SCADA system and transforms them into a unified system that can be managed from the headquarter remote control center. With this independent second-level SCADA solution, you can manage several wind, solar, and hydro plants with only one system while also working with high ...

With the OneView ® Park SCADA, you get full ownership of all the data collected from the renewable assets. Our SCADA software is OEM independent, and you can choose to either replace your existing SCADA solution or connect it, depending on your needs. Either way, you get flexibility at your fingertips!

The installation will also bring EDF closer to its Solar Plan's objectives of making it one of France's leading players of solar energy with a 30% market share by 2035. The Toucan 2 photovoltaic power plant, which is located in the French Guiana municipality of Montsinéry-Tonnégrande, boasts abundant solar irradiation at the near-5-hectare site.

At SCADA International, we design, build and manufacture future-proofed hardware for renewable energy projects. Our tailor-made solutions are developed and configured to match your needs and industry-specific challenges. Our unique expertise in SCADA systems enables us to build our hardware ourselves, regardless of

EDF Energies Nouvelles announces the commissioning of Toucan photovoltaic facility (5 MWp) in French Guiana. The new solar power plant, one of the first of its kind in France and globally, integrates energy storage capabilities and features electrical control systems equipment highly innovative.

Data from six measurement sites located in French Guiana are used for GHI prediction. Five years of data from the six stations were used for the learning phase and one year for the ...

Solar Vision is a cutting-edge integrated Supervisory Control and Data Acquisition (SCADA) system that is specifically designed to optimize the operation and monitoring of solar PV assets. Powered by Andritz's Metris Digital Solution, Solar Vision SCADA provides PV plant owners and operators with comprehensive
