

Seiko Photovoltaic Bracket Series

Are Seiko watches solar powered?

Solar powered watches from Seiko. Never buy a battery again and benefit from a superb power reserve.

What is the future of the Seiko Astron GPS solar?

A new design series paves the way for the future of the Seiko Astron GPS Solar. Each of the new watches is powered by a new GPS Solar movement, Caliber 3X62, whose enhanced reception of solar signals allowed for greater freedom in design.

What are the features of the Seiko solar series?

The Seiko, Solar series features a stainless steel 43mm case, with a fixed bezel, a dark blue dial and a scratch resistant hardlex crystal. The 22mm leather band is fitted with a buckle clasp. This beautiful wristwatch, powered by Japan quartz movement supporting: date, day, hour, minute, second functions.

How does the Seiko Astron work?

By connecting to the GPS network, the Astron adjusts at the touch of a button to your time zone and, powered by energy from light alone, never needs a battery change. Watches powered by the Seiko in-house built 3X calibre with GPS functionality- exceptional accuracy updated remotely by GPS satellite when the wearer moves between timezones.

What is a Seiko 3x62?

Powered by Seiko's new GPS solar caliber 3X62, with the improved receiver sensitivity required by the metallic bezel, this exceptional watch is GPS controlled for high-speed time and time zone adjustment to 39 time zones, and includes an in-flight mode and perpetual date calendar correct to the year 2100.

How does a Seiko Watch work?

Watches powered by the Seiko in-house built 5X calibre with advanced functionality - every component in the GPS module has been re-engineered to make it faster and more intuitive than ever. Just three seconds are needed to advance 14 hours from Tokyo to New York time, thanks to the system that moves hour, minute, and second hand independently.
