How many people in Senegal will get solar power?

Nearly 540,000 people in Senegal will get access to clean and affordable power following the launch of two solar photovoltaic (PV) plants, financed by IFC, the European Investment Bank and Proparco, under the World Bank Group's Scaling Solar program.

Does Senegal need a solar power plant?

Senegal's power sector has been historically reliant on costly fuel imports, with about 80 percent of its energy mix being oil-based. "The Kael and Kahone solar power plants exemplify our commitment to supporting Senegal's transition to cleaner, more affordable energy, while creating business opportunities for local communities.

Will solar be Senegal's cheapest energy source?

The planned Scaling Solar projects underscore Senegal's commitment to integrating renewable energy resources into its energy mix. The successful tender set a new benchmark for the region. With prices under 4 US cents per kWh, solar energy will become Senegal's cheapest energy source. Questions or Interest? Subscribe to our mailing list.

Who sponsors Senegal's solar power plants?

The PV plants, located in Western Senegal, are sponsored by Engie, Meridiam, and the Senegalese Sovereign Wealth Fund for Strategic Investments (FONSIS). The competitive tendering process was led by Senegal's Energy Regulatory Commission (CRSE). For more information, please read the press release [here](#).

How many people in Senegal have electricity?

According to World Bank data, over 70% of the population of Senegal currently has access to electricity. The planned Scaling Solar projects underscore Senegal's commitment to integrating renewable energy resources into its energy mix. The successful tender set a new benchmark for the region.

Can Senegal develop 60 megawatts of solar power?

The government of Senegal has been working with the World Bank Group to develop 60 megawatts of solar power through Scaling Solar. According to World Bank data, over 70% of the population of Senegal currently has access to electricity.

"This project is part of the electricity mix advocated by the State of Senegal and contributes to increasing the share of renewable energy on the SENELEC network and significantly to the supply/demand balance," says the ...

Senegal is the second country to bring Scaling Solar-backed PV projects to the operational stage. In March 2019, the first solar plant financed and tendered under the Scaling Solar program was inaugurated in Zambia.

Senegal best solar energy company

"This project is part of the electricity mix advocated by the State of Senegal and contributes to increasing the share of renewable energy on the SENELEC network and significantly to the supply/demand balance," says the public company.

Nearly 540,000 people in Senegal will get access to clean and affordable power following the launch of two solar photovoltaic (PV) plants, financed by IFC, the European Investment Bank and Proparco, under the World Bank Group's Scaling Solar program.

The Engie-Meridiam consortium secured Kahone and Kael in Senegal's first Scaling Solar tender after placing bids of below EUR 0.04 (USD 0.049) per kilowatt-hour. The two plants will operate under a 25-year power ...

The Engie-Meridiam consortium secured Kahone and Kael in Senegal's first Scaling Solar tender after placing bids of below EUR 0.04 (USD 0.049) per kilowatt-hour. The two plants will operate under a 25-year power purchase agreement (PPA) with local electricity company Senelec.

Overall, the Senergy project is a significant contributor to Senegal's installed solar PV capacity and is providing clean and affordable power to more than 200,000 Senegalese people. A dedicated team is responsible for supervising Meridiam's four solar plants in Senegal.
