Rapidly scaling up solar PV installations will lower electricity expenses for consumers and increase the reliability of the island's power supply while contributing to St. Maarten's overall sustainability goals, the report concluded.

The island's small and hilly terrain makes large-scale solar and wind energy installations difficult, as many potential locations are already used for tourism and housing. Additionally, compared to Aruba and Curaçao, St. Maarten has less strong and consistent wind, making wind energy less viable and necessitating more robust and costly wind ...

Regarding areas suitable for large-scale solar PV installations, the most promising locations would be the relatively flat or gently sloping areas inland from Koolbaai. These areas offer several advantages for solar energy production: They receive ample sunlight throughout the year due to Sint Maarten's tropical location.
