To effectively promote the application of solar PV energy interconnections and encourage investors to install PV systems, the Macao SAR Government, in addition to publishing the "Regulation on Safety and Installation of Photovoltaic Solar Energy Interconnections", also established a feed-in tariff system (effective as of 1 July, 2018).

As a commercial hub, Macao faces the same challenge. Energy consumption from electricity, transport and buildings accounts for nearly 90 per cent of Macao's carbon emissions directly caused by fossil fuels. With climate change posing grave threats to the future of society, city leaders say they have made reducing
