

Energy storage is a key solution for isolated Microgrids. It ensures power reliability and allows the management of multiple power generation sources. Socomec design turnkey Energy storage solutions, including all equipment integrated within a single container :

Nice Grid, storage for integrating renewable energy and islanding Paradise, a smart network for the local community Solenbat optimises the active energy efficiency of buildings Stem, energy storage systems for reduced electricity billing

At Socomec, we offer a comprehensive range of Battery Energy Storage Systems designed to meet diverse energy needs. Socomec systems are composed of advanced power conversion technologies and LFP batteries driven by intelligent Battery ...

To expand their energy storage projects, Energon opted for Socomec products to equip an electrical vehicle charging station with an energy storage system. Learn more about this project and the solution provided by downloading the case study.

The Solenbat project aims to maximise the capacity of a building to become an energy provider. Studies and experiments focus on reducing consumption, local PV electricity production, energy storage and smart management of the exchange of electricity with the public grid.

Lohéac, Socomec presents its e"car demonstrator: a mobile energy storage unit and the electric car that completes it. This program, conducted in partnership with E"nergys, IBS andPegasus Racing, aims to enable the rapid recharging of future electric racing cars, using clean energy storage solutions and without

Socomec unveils new outdoor energy storage system dedicated to high power applications Read more. Image. Solutions & Offers. 28, March 2023. Empowering electric vehicle charging infrastructure through Energy Storage Read more. Image. Customers Success. 14, March 2022. Collective self-consumption Read more.
