

# Solar Power Generation Fan Toy Making

How do you make a solar powered fan?

With the "Green Science Fair" contest running on Instructables we decided upon making a solar powered fan out of it. It's really pretty basic. We took a battery holder (2 AA batteries) and wired it into a 1.5V to 12V step up circuit. Now that we had it outputting 12V we hooked it into the fan.

Can you make a solar powered fan out of an old computer?

When we were taking apart an old computer (fun stuff!) we discovered a lot of very cool parts that we could use to make stuff. One of the cooler ones (sorry, very lame pun) was a 12V cooling fan. With the "Green Science Fair" contest running on Instructables we decided upon making a solar powered fan out of it. It's really pretty basic.

What is c3j1r0's solar powered mini-fan?

It's a cool solar powered mini-fan. The idea is that if you had a fan you would use the air conditioning less. And it's solar powered so that it has 0 emissions. Finally, this is the first of many collaborations between c3j1r0 and I. As always, feedback is greatly appreciated. It's the sharing of ideas that keeps an open source community together.

How do you attach a fan to a battery pack?

Now you are almost done. Just attach the fan to the board (through the holes in the box) and finish off the circuit at the third wire on the negative side of the battery pack (inside the box). And there you have it! There are a couple more finishing touches to complete the fan.
