## Solar panel finance scheme Venezuela

Where is the first solar cell made in Venezuela?

In 2018, Venezuela announced the manufacture of its first solar cell: the development and research took about a year and was carried out at the facilities of the National Center for Optical Technologies (CNTO), attached to CIDA and located in the Libertador de Mé ridamunicipality.

#### Can I get a home equity loan if I have solar panels?

If you know how much your solar panels will cost, you can apply for a fixed-ratehome equity loan. These loans have lower rates and longer repayment terms than unsecured loans because putting up your home as collateral lowers the risk for a lender. » MORE:Best home equity loans Home equity line of credit

### How did President Maduro promote the development of a solar industry?

The activity was financed by the National Fund for Science, Technology and Innovation (FONACIT). President Maduro expressed his desire to promote the development of a solar industry in 2013. Since then, however, only small, off-grid photovoltaic projects have been carried out, for isolated regions.

#### Do solar panels save money?

Solar panels will help people in some parts of the country save more money than others. For example, someone in Seattle might not get the same value from solar panels as someone in Phoenix because of the disparity in sunshine. To estimate your savings, you first need to know how many kilowatt-hours you use and how much you're paying for them.

#### Are solar panels tax deductible?

The federal government provides a 30%tax credit to those who purchase and install a new solar panel system in their home by 2032. For example, if you install solar panels in 2024, you could receive a \$6,000 credit on a \$20,000 system with the federal tax credit alone. Tax credits reduce your tax liability.
