

Does Sao Tome & Principe have solar power?

According to data from the International Renewable Energy Agency (IRENA), Sao Tome and Principe did not have any grid-connected solar generation capacity installed at the end of 2021. The World Bank says Sao Tome and Principe has an electricity access rate of around 76%, with 92% of the total coming from imported diesel.

Where will solar power plants be installed in so Tomé?

The company will collaborate with the public utility Power and Water Company (EMAE) to install solar power plants across the country. The first phase of the program will include the installation of solar PV plants at the São Tomé international airport, as well as on the island of Príncipe, with capacities of 1.1 kW and 300 kW, respectively.

When will a 300 kW power plant be installed in Sao Tome?

Cleanwatts told pv magazine that it started developing 1.1 MW at Sao Tome airport and 300 kWp at Principe airport in August. It expects to complete the arrays by the end of this year. Another 300 kWp will be installed next year at other communities in Sao Tome.

How long does it take to build a photovoltaic plant in so Tomé?

The first phase of the project will see the installation of photovoltaic plants at the country's national airport in São Tomé, as well as on the island of Príncipe. Cleanwatts vice chairman and co-founder Basilio Simoes said the two airport projects would take less than three months (for the smaller plant) and up to two years to build.

Why are solar panels coming to so Tomé?

Abreu noted that "the panels and other equipment have arrived in the Port of Ana Chaves in São Tomé, following delays and uncertainties due to a shortage of maritime transport." According to World Bank data, 76.6% of the population of São Tomé and Príncipe have access to electricity, generated primarily through imported diesel (92%).

Who is Pleno Ambiente STP?

Cleanwatts' local partner Pleno Ambiente STP will undertake the installation, operation, and maintenance works. The new deal will go a long way towards revolutionizing São Tomé and Príncipe's relationship with energy, along with addressing gaps in affordability and security of supply.

Solar energy, with its strong decentralized potential, is an energy potential for Santo means in rural and peri-urban areas. Since the colonial era, STP has been supporting its renewable potential and intends to intensify its use, particularly hydro energy.
