

Solar photovoltaic panels for yachts

Why should you buy a yacht with solar panels?

The solar panel of choice... and a must for long distance cruising! Imagine, every time you board your yacht, all the battery power is immediately available. Satellite navigation, computer, refrigerator, engine starting and all the on board comforts and safety features for a day cruise or trip on the high seas.

What is a yacht solar kit?

Our high-quality yacht solar kits include the components needed to achieve power independently - whether the yacht is at the marina or on the water. Our kits are easy to install and come with a choice of flexible solar panels, to help with fitting to all kinds of yacht and boat designs.

Are boat solar panels a good idea?

Photo: Catchlight Visual Services/Alamy Keeping batteries topped up without resorting to running the engine is an ongoing problem for yachtsmen. Boat solar panels are an obvious option, not just in the Med but also around the coasts of the UK as the price of panels has fallen over the years.

What is the best flexible boat solar panel?

Best flexible boat solar panel Delivering a mighty kilowatt of power, (not far off the amount used by a one bedroom house), this Giostar package comprises ten separate 100W panels, each of which is 1,050 x 540 x 2.5mm in size.

Are rigid solar panels a good choice for a yacht?

Rigid solar panels are covered with impact-resistant glass in a metal frame, and often require hardware to install. Over time, the hardware and frame can corrode in unforgiving marine conditions, so it's important to choose one with added weather protection. Solar is well suited to use in yachts.

Are marine solar panels suitable for cruising?

Marine solar panels rated 40W and under are suitable for weekend cruising, and keeping 12V batteries topped up. Low-profile and flexible panels are ideal where space is at a premium. If you can't see exactly what you need please contact us - we can customise any kit to suit your requirements.
