

Solar power generation rental fee

How much does a solar lease cost?

Assuming that the solar company arranges the lease payments to remain cash flow-neutral, you would pay £450 per year in lease payments. As a result, the cost to you over the 20-year agreement would be $20 \times £450 = £9,000$. The opportunity cost of purchasing is more evident when you consider what you could do with your saved capital.
