Solar PV: Solar resource potential has been divided into seven classes, each representing a range of annual PV output per unit of capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across the classes (for comparison).

According to a recent study by the International Renewable Energy Agency (IRENA), Equatorial Guinea has the potential to generate up to 3,000 megawatts (MW) of solar power. This could significantly contribute to the country's energy mix and help meet its growing electricity demand.

Aptech Africa pioneers sustainable development by installing 11 solar systems in remote Equatorial Guinea villages, enhancing education, healthcare, and community empowerment through reliable, clean energy sources.
