

Decarbonisation plans in North Macedonia are taking a big leap forward. The European Union (EU) is supporting ESM, the state-owned electricity company, to implement a 30 MW photovoltaic (PV) project consisting of 10 MW on a portion of the exhausted coal mine of thermal power plant Oslomej, and 20 MW adjacent to the thermal power plant Bitola.

The first large-scale solar plant in North Macedonia has been connected to the power grid and is already producing clean electricity. The plant has been financed with the support of the Western Balkans Investment Framework (WBIF) bilateral donors and the European Bank for Reconstruction and Development (EBRD).

It is the largest photovoltaic facility in North Macedonia and the Western Balkans. Prime Minister Dimitar Kovacevski said North Macedonia has proven that it can implement projects that bring stability and security to ...

The Slovenian Gen-I Group has inaugurated a solar power plant with an installed capacity of 12 MW near Kavadarci, North Macedonia. This facility is expected to generate up to 15,500 MWh of electricity annually, significantly contributing to the country's decarbonization efforts.

The state-owned electricity company of North Macedonia, Elektrani na Severna Makedonija, has published a call for a contractor, and the selected company would build two solar power plants, with a capacity of 10 MW and 20 MW, in ...

With its abundant sunlight and favorable climate, the country is well-positioned to harness solar energy through photovoltaics (PV). This article explores the current state of solar energy in ...

Decarbonisation plans in North Macedonia are taking a big leap forward. The European Union (EU) is supporting ESM, the state-owned electricity company, to implement a 30 MW photovoltaic (PV) project consisting of 10 ...

A Renewable Energy Future in North Macedonia: A Blueprint for Accelerating the Transition. Research identifies twice the land needed to meet the country's electricity demand without unduly impacting nature and communities. October 04, 2023

This is the company's first solar plant in North Macedonia, developed with a view to diversifying energy sources and supporting decarbonisation. It is expected to produce nearly 15 GWh of electricity and ...

It is the largest photovoltaic facility in North Macedonia and the Western Balkans. Prime Minister Dimitar Kovacevski said North Macedonia has proven that it can implement projects that bring stability and security to

electricity supply and ...

This is the company's first solar plant in North Macedonia, developed with a view to diversifying energy sources and supporting decarbonisation. It is expected to produce nearly 15 GWh of electricity and displace 12,177 tonnes of CO₂ annually.

With its abundant sunlight and favorable climate, the country is well-positioned to harness solar energy through photovoltaics (PV). This article explores the current state of solar energy in North Macedonia, the opportunities for growth, and the challenges that must be addressed to ...
