Standalone solar kit Singapore

Stand Alone PV System A Stand Alone Solar System. An off-grid or stand alone PV system is made up of a number of individual photovoltaic modules (or panels) usually of 12 volts with power outputs of between 50 and 100+ watts each. These PV modules are then combined into a single array to give the desired power output.

Off Grid / Stand Alone Systems In this modern world, there are still 2 billion people living without electricity grid worldwide. We have developed a special range of Solar Home Systems for these people, especially those living in Asia, Latin America and Africa.
