

By returning the hard coal-fired power plants in Bexbach and Weiher to the market from the grid reserve and continuing to operate the plants in Bergkamen and V&#246;lkingen that are scheduled for decommissioning, we are helping to ...

Since the 1930s, STEAG has been a coal-fired power producer from the industrial heartlands in Germany spread across the Nord Rhein Westphalia, Saarland, and Baden W&#252;rtemberg regions. In the recent years STEAG has partially divested one thermal power plant in the Philippines.

By returning the hard coal-fired power plants in Bexbach and Weiher to the market from the grid reserve and continuing to operate the plants in Bergkamen and V&#246;lkingen that are scheduled for decommissioning, we are helping to secure the energy supply.

SPM is a European leader in the provision of power plant by-products (especially fly ash and FGD gypsum) and expendable blasting abrasives, helping its clients to reduce carbon footprint. SPM also provides a broad range of waste management services.

STEAG Power GmbH for fossil fuel-fired power generation. The latter is meant to shut down once all coal and gas assets have been decommissioned. Both divisions are subsidiaries of STEAG GmbH, though they operate with their own brand identity and support functions.

Steag GmbH, the former &quot;Steinkohlen-Elektrizit&#228;t AG&quot; (&quot;Anthracite Electricity Company&quot;) is a German power company. As of 2022, it is Germany's fifth largest utility. It operates also in the field of transport, processing and distribution of hard coal, coke and byproducts from coal processing, as also in the field of gas supply, transport and trading.

STEAG GmbH was the central management company of the STEAG Group until the end of 2022. Since the division of the Group into a black coal division and a green growth division, STEAG GmbH has acted as the management holding company.
