

Stellar energy Martinique

Stellar Energy confirmed in a news release issued Jan. 23 that it is expanding its manufacturing capacity in Jacksonville after a deal with the city as Project Orion. The Jacksonville-based company said it plans to triple manufacturing capacity in 2024 and projects a fivefold increase in 2025, creating 250 jobs this year.

Stellar Energy provides bespoke state-of-the-art solutions customers build in for optimized performance now, bridging a critical gap in the energy transition towards a better future. In business for over 25 years, we've added efficiency and capacity to customer infrastructure in more than 15 countries.

From evaporative cooling and mechanical inlet air chilling to thermal energy storage and a new hybrid direct contact air chilling technology, Stellar Energy offers a range of solutions to help power generators recapture lost megawatts and restore combustion gas turbines to name plate capacity and beyond.

Martinique: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.
