Can you store lithium ion batteries in the UK?

The UK doesn't have specific regulations or legislation for the general storage of lithium-ion batteries. The Health and Safety Executive has, however, published guidance on good practices for handling and storing batteries, even though it is not compulsory. Regulations are not prescriptive but instead follow the typical routes:

How do you store a lithium ion battery?

In general lithium-ion batteries should always be removed from the devices they power and stored at 60-70% of the pack's capacity. If a battery will go unused for three more days, it should be stored in a cabinet or larger store. Once disconnected, storing lithium-ion batteries follows similar principles as the correct storage of chemicals.

How much SoC should a lithium ion battery have?

It is defective or becomes damaged. When transported by air, the maximum allowable SOC of lithium-ion batteries is 30% and for static storage the maximum recommended SOC is 60%, although lower conditions for lithium-ion batteries. The scale of use and storage of lithium-ion batteries will
