How many rails does a solarmount need?

The 156-inch SolarMount rail (part number 300011) is my best bet. Each row of modules requires two rails (top and bottom). This system,which has two rows of modules,requires four rails. Further,since I will be splicing two 156" rails in order to reach the required 294.6" rail length,I will need a total of eight 156" rails.
