

## Svalbard and Jan Mayen outdoor pv speicher

Climate gases in Svalbard; Air temperature and precipitation; UV in Ny-Ålesund; Ocean. The transport of freshwater through the Fram Strait; Thickness of sea ice in the Arctic Ocean measured in the Fram Strait; Sea ice extent in the Barents Sea and Fram Strait; Sea level; Temperature and salinity in the Fram Strait; Land. Mass balance for ...

MOSJ (Environmental Monitoring of Svalbard and Jan Mayen) is an environmental monitoring system and part of the Government's environmental monitoring in Norway. An important function is to provide a basis for seeing whether the political targets set for the development of the environment in the North are being attained.

The developed pilot project with 360 solar panels is located in Svalbard on the Spitsbergen island - Svalbard's only permanently inhabited island, located 1,300 km (808 miles) from the North Pole. Furthermore, it also includes battery storage.

Norway has installed the world"s northernmost ground solar panels in its Svalbard archipelago, a region plunged in round-the-clock darkness all winter. The pilot project could help remote Arctic...
