What is gas insulated switchgear (GIS)?

Hitachi Energy's gas-insulated switchgear (GIS) portfolio offers a complete range of products for all ratings and applications from 72.5 kV to 1200 kV. Hitachi Energy offers a wide range of air-insulated switchgear (AIS) portfolio up to 1100 KV used in all types of climates and applications.

Why should you choose Siemens Energy circuit breaker?

All Siemens Energy high-voltage circuit breakers are designed in a well proven modular platform concept. This leads to a wide variety of breaker types and strong flexibility with regard to various applications according to our customers' requirements as well as high availability at eminently competitive price.

Why should you use blue switchgear?

This means eliminating F-gases from electrical switchgear - particularly SF₆, a gas 24,300 times more climate-hostile than CO₂. Our Blue portfolio uses clean air and vacuum switching technology instead. Zero F-gases, Zero toxicity and Zero harm to human health and the environment. Less global warming potential is not good enough.
