

In the 2000s, Syria's electric power system struggled to meet the growing demands presented by an increasingly energy-hungry society. Demand grew by roughly 7.5% per year during this decade, fueled by the expansion of Syria's industrial and service sectors, the spread of energy-intensive home appliances, and state policies (i.e. high subsidies and low tariffs) that encouraged wasteful energy practices. Syria's inefficient transmission infrastructure compounded these probl...

Hitachi to Donate to Support Earthquake Relief Efforts in Türkiye and Syria. Tokyo, February 15, 2023
- Hitachi Group extends its deepest sympathies to all those affected ...

Hitachi Energy Ltd. is a technology company headquartered in Zurich, Switzerland. The company's products include high-voltage equipment, transformers, and services for renewable energy. The company is a subsidiary of multinational conglomerate Hitachi Ltd.

Several factors have contributed to Syria's accelerated transition to renewable energy. First, the war has severely damaged traditional energy infrastructure, driving local communities to seek sustainable alternatives. Second, displacement has put pressure on host communities, increasing the demand for electricity.

Hitachi to Donate to Support Earthquake Relief Efforts in Türkiye and Syria. Tokyo, February 15, 2023
- Hitachi Group extends its deepest sympathies to all those affected by the earthquake that struck in the southeast of the Republic of Türkiye near the border with the Syrian Arab Republic on February 6, 2023.

Hitachi Energy today announced that it is the lead in a consortium that has been awarded a major contract worth several hundreds of millions of US dollars from the Saudi Electricity Company and the Egyptian Electricity Transmission Company.

Hitachi Energy Ltd. is a technology company headquartered in Zurich, Switzerland. The company's products include high-voltage equipment, transformers, and services for renewable energy. The company is a subsidiary of multinational conglomerate Hitachi Ltd. The company was formerly known as Hitachi ABB Power Grids, following a joint v...

Energy in Syria is mostly based on oil and gas. [1] Some energy infrastructure was damaged by the Syrian civil war. There is high reliance on fossil fuels for energy in Syria, [2] and electricity demand is projected to increase by 2030, especially for industry activity such as automation. [3]

The splintering of Syria into numerous spheres of control, with the al-Assad government controlling territory predominantly in the south-west of the country, has had a dramatic impact on Syria's energy sector. Damage to energy infrastructure has adversely affected production, revenues, domestic consumption and investment.
