

Due to the size of its land area, and the availability of land for the production of electrical energy through solar panels, the ideal scenario for São Tomé and Príncipe is the combination of different sources of clean energy generation, being hydroelectric and solar.

Partnering with the country's public utility EMAE, we're set to install photovoltaic plants at São Tomé's national airport and on Príncipe Island. Spearheaded by our vice chairman Basilio Simoes, this project promises swift and impactful results, with the smaller installation expected to be operational in just three months.

Portuguese cleantech company Cleanwatts has signed an agreement with São Tomé and Príncipe in Africa for the production and sale of clean energy. The company will collaborate with the public utility Power and Water Company (EMAE) to install solar power plants across the country.

One feasible path for São Tomé & Príncipe to increase its low-carbon electricity generation is by integrating more solar and wind power solutions, as demonstrated by countries with similar ...

As part of the first phase of the program, the national airports on the island of São Tomé will get a 1,100kW solar PV plant, while the one on Príncipe will get a 300kW solar ...

One feasible path for São Tomé & Príncipe to increase its low-carbon electricity generation is by integrating more solar and wind power solutions, as demonstrated by countries with similar attributes.

This platform is designed to provide information and updates about São Tomé and Príncipe's upcoming solar procurement initiatives. As the country transitions toward renewable energy, we aim to create transparent and competitive processes to attract qualified international investors, ensuring long-term energy sustainability.

Description: São Tomé and Príncipe (STP) is a country of opportunities. The energy resources are vast and are not limited to charcoal and firewood. The country has some water courses with enormous potential for producing electricity.

Partnering with the country's public utility EMAE, we're set to install photovoltaic plants at São Tomé's national airport and on Príncipe Island. Spearheaded by our ...

"As of 2020, the Government of Sao Tome and Principe is planning for the hybridization of one of the main

São Tom and Príncipe solar gadgets

thermal power plants (Santo Amaro) with solar photovoltaic technology through the Energy Transition and Institutional Support

As part of the first phase of the program, the national airports on the island of São Tom will get a 1,100kW solar PV plant, while the one on Príncipe will get a 300kW solar PV plant.

Description: São Tom and Príncipe (STP) is a country of opportunities. The energy resources are vast and are not limited to charcoal and firewood. The country has some water courses ...
