Intercel en Bredenoord zijn een partnerschap aangegaan bij de ontwikkeling van de Battery Box 30 van Bredenoord. De Battery Box 30 is ontwikkeld om te voldoen aan de toenemende vraag naar betrouwbare en duurzame oplossingen voor energieopslag, vooral in afgelegen gebieden of locaties waar de toegang tot het elektriciteitsnet beperkt is.

The Battery Box is a compact and versatile energy storage unit. With a footprint of 80x120 cm, the Battery Box 30 is the same size as the ESaver introduced by Bredenoord in 2013. However, the capacity has increased dramatically from a small 30 ...

Storing sustainable energy on varying locations The Battery Box can easily be moved between different projects. The system can also be used to bridge during the (delayed) installation of a grid connection. As part of a smart grid In which ...

ENGIE and Bredenoord, developer of decentralized energy systems, will jointly market a fleet of battery boxes. The so-called Battery Box can reduce the use of fossil fuels in existing energy systems. The fleet of batteries currently consists of six Battery Boxes that can be used individually or in combination.
