

# The difficulty of upgrading from a junior college to a bachelor's degree in solar power generation

Are millennial students more likely to get a bachelor's degree?

Among Millennial students, the predicted probability of bachelor's degree completion associated with the highest educational expectations was similar for non-Hispanic White students (AME = 0.595, 95% CI = 0.583, 0.608) and students from another racial and ethnic background (AME = 0.593, 95% CI = 0.552, 0.635).

Are first-generation students more engaged in academics than continuing-generation students?

The findings show that first-generation students were less involved in academics and had lower gains in intellectual development and engagement with diverse perspectives than did continuing-generation students. There was no significant difference between the two groups on first-to-second year persistence rates.

Are first-generation students less likely to get a college degree?

Our work is in line with Wilbur and Roscigno (2016), who found that first-generation students were 23 percent to 58 percent less likely to complete their four-year college degree than their non-first-generation peers using nationally representative 2002 to 2012 Educational Longitudinal Survey data (Wilbur and Roscigno 2016).

Which generation has the lowest educational expectations?

Hispanic students consistently had the lowest educational expectations across generational cohorts. Racial and ethnic differences in educational expectations for Generation X ( $p < .001$ ) and Millennials ( $p < .001$ ) were statistically significantly different.

Why is there a generational difference in education?

This generational difference could be partly explained by the convergence of social forces and policy changes, such as the passage of Title IX of the Educational Amendments of 1972, the Civil Rights Act of 1964, second wave feminism, and the advancement of coed institutions during the 1970s (Park et al. 2015).

What age should a bachelor's degree be completed?

Note: Shaded bars indicate possible exposure to sociopolitical events from birth to age 24, the maximum age for our primary outcome, bachelor's degree completion by modal age 23 to 24, for all included generational cohorts.
