

# The installation process of solar panels

How do I install a solar panel?

Installing your solar panel is a straightforward process though calling in professional installers is recommended. Making sure these installers are accredited by MCS is highly important, so as to ensure a high standard of installation. A solar panel will be most effective if you have a south-facing roof.

How does a solar panel installation work?

The installer will have to lift some of the roof tiles to fix the anchors to the rafters in the loft. This will give the solar panel mounts a stable foundation, and will make sure they don't get damaged in stormy weather. Once the roof anchors have been fixed to the property, the installer will attach the solar panel mounting system to them.

How long does it take to install a solar inverter?

The installers will set up the inverter by the breaker panel, a sort of hub for all electrical circuits within your home. The installation process will take around 4 to 6 hours. If you have decided to also buy a solar battery, enabling you to store energy produced by your panel for later consumption, then the inverter will be connected to it.

Can I install solar panels myself?

You can install solar panels on your home yourself. You will need some electrical wiring experience, and we suggest that you also use a professional solar contractor or electrician to do the wiring and connection processes to ensure that you: Do not start an electrical fire that damages or destroys your home, solar array, and solar components.

What is a DIY solar panel installation?

DIY installations allow you to customise your solar panel system to match your home's energy needs and roof layout (or perhaps even a balcony). Some professional installations may offer limited options, while a DIY approach allows for optimising panel placement, choosing specific components, and tailoring the system for maximum efficiency.

How long does it take to install solar panels?

"When you have decided that you would like solar panels fitted, a desktop survey and quote is done," explains David. "This should not take more than about an hour or so to prepare. You may want to get two or three quotes from different installers to compare quotes and service."
