Erect the scaffolding (this can be done by your supplier or by a company you organise) 6. The solar panel mounts will be installed 7. The professionals will install the solar panels 8.

What should I consider before choosing a solar panel company?

Before you invite any solar panel firms to give you a quote, consider what type of solar PV you want. The most popular, most efficient and most expensive option. Very space efficient, so they need the smallest amount of roof space. Made from a very pure form of silicon. High power output.

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

How do I choose a solar PV company?

Check local planning regulations to make sure you're allowed to install a solar PV system (see above). Check that the solar PV company is MCS certified and a member of the Renewable Energy Consumer Code (RECC). Don't accept a price over the phone before the firm has visited. Get an Energy Performance Certificate for your home.

What type of solar panels do you need?

Silicon is the most common. Before you invite any solar panel firms to give you a quote, consider what type of solar PV you want. The most popular, most efficient and most expensive option. Very space efficient, so they need the smallest amount of roof space. Made from a very pure form of silicon.

Do solar panels add value to a house?

Boosting your rating from F to C, for example, can increase the value of your home by up to 15%. Our Energy Experts also found that installing 10 solar panels can increase your EPC rating by 1 band. For a 3-bedroom semi detached house, installing 10 solar panels would cost approximately £6,300. But they could add much more value than they cost.
