

Built in 1921, Power Plant IM was once one of Belgium's largest coal-burning power plants; by 1977, it had become Charleroi's main source of energy and cooled an astounding 500,000 gallons of water per minute. According to AtlasObscura , "water would be let into the cooling tower where it would be cooled by the wind that swept in from ...

In a small district known as Monceau-sur-Sambre, within the Belgian town of Charleroi, there is an abandoned power station, the magnificent abandoned cooling tower of which still looms over the town no longer creating electricity, but providing a variety of surreal vistas. The Power Plant IM is owned and was operated by Electrabel, a Belgian...

Power plant IM is one of Belgium's most famous Urbex locations. This abandoned power station is located on the outskirts of Charleroi, a one-hour drive from Brussels, in the Walloon region of Hainaut.

The following page lists power stations in Belgium. Operational Power Plants. Fossil. Name Operator Site Coordinates Main fuel Capacity Amercoeur Power Station: Electrabel: Amercoeur ... Tihange Nuclear Power Station, Unit 3: Huy PWR: 1054MW: 1985/06/15 Wind. Wind Offshore ...

4 ???&#0183; Het Power Swap Station is geschikt voor alle NIO-modellen, zowel voor de Standard Range-uitvoeringen met een 75 kWh batterij als de Long Range-versies met een 100 kWh accupakket. Net als bij andere Power Swap Stations hoeven NIO-users bij het wisselstation in Edegem enkel op de aangeduide parkeerplaats v&#243;&#243;r het Power Swap Station te parkeren ...

In the heart of Charleroi, Belgium, lies a monumental relic of industrial power and a testament to changing environmental attitudes: the Power Plant IM. This blog post delves into the history, operations, and eventual decline of this once-mighty coal-fired power station, now a haunting site for urban explorers and photographers.
