

Turkmenistan: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country. Some of these energy sources are used directly while most are transformed into fuels or electricity for final consumption.

Intergovernmental structure; Commission sessions. Chair of the Commission; Members of Bureau; ... Turkmenistan - Energy Brief 2024. Languages and translations. English.
