

What is EnerBlu cogeneration SRL?

The mission of Enerblu Cogeneration Srl is to offer its customers technologically advanced energy efficiency solutions as well as a service that continuously aims at excellence.

Who makes EnerBlu cogenerators?

Thanks to Costell's entry into the group, Enerblu is today the only Italian company with a complete range of cogenerators, from 6 kWe to 20 MWe with endothermic engine or turbine technology.

What makes EnerBlu a good cogenerator?

Enerblu designs in detail all its machines and directly produces all the heat exchangers that equip the cogeneration units, including water / exhaust gas exchangers, thus creating a product that fully meets the needs of the customer. Very rich is also the range of cogenerators for biogas plants fed by animal waste or landfill gas.

Who is EnerBlu cogeneration?

In the fields of combined heat and power, biogas and biomethane, Enerblu Cogeneration is one of the market leaders for those who want to improve their competitiveness whilst saving energy and curbing environmental emissions.

Can EnerBlu supply Tele-assisted cogeneration Islands?

Enerblu is able to supply complete and fully tele-assisted cogeneration islands remotely from our service, managing all the main thermal vectors such as hot, cold (air conditioning and refrigeration) and superheated water, steam, diathermic oil, hot air.

What type of gas does EnerBlu use?

Furthermore, Enerblu's cogeneration plants are able to operate using methane gas, LNG (liquefied natural gas), LPG, biogas/biomethane and now, thanks to the introduction of a new dedicated product range, also using hydrogen.
