

Who is Vida energy?

Vida Energy is one of Sweden's largest biofuel players and leads the Group's efforts in the bio-energy market. We take advantage of the by-products that result from felling and processing in the sawmills by converting these into renewable energy in the form of energy-efficient products such as whole tree chips, stemwood chips and pellets.

How much energy does Aruba consume annually?

Aruba has an annual consumption of 990 gigawatt-hours (GWh). Currently, about 13% of its generation comes from a 30-MW wind project and 0.9% comes from waste-to-energy (WTE) biogas. An additional renewable capacity of 34 MW is planned or in progress. Aruba's installed generation capacity is 230 megawatts (MW) with an average load of 100 MW.

Where does Aruba get its electricity from?

Aruba currently gets 15.4% of its electricity from renewable sources. The island has sufficient renewable energy resource potential, with excellent technical potential for ocean, wind, and solar renewable energy generation.

What is the cost of electricity in Aruba?

The energy landscape of Aruba, an autonomous member of the Kingdom of the Netherlands located off the coast of Venezuela, is outlined in this profile. Aruba's utility rates are approximately \$0.28 per kilowatt-hour (kWh) (below the Caribbean regional average of \$0.33/kWh).

Where does Vida energy produce pellets?

Other production is sold to thermal power stations while sawmill chips are sold to the external pulp and paper industry. Vida Energy is also one of Sweden's largest suppliers of top-quality pellets. It has an annual production of approximately 65,000 tonnes, and Vida Energy supplies pellets to a large part of southern Sweden.

these into renewable energy in the form of energy-efficient products such as whole tree chips, stemwood chips and pellets.

Aruba is on track to fuel 50 percent of the island's energy needs with wind and solar power by 2014, and is looking to use more natural gas to replace expensive fuel oil. This is especially important in the context of utility prices, which place a huge burden on Aruban households, accounting for 30-35 percent of expenditures.
