What is the circular on solar power development in Vietnam?

Vietnam's Ministry of Industry and Trade recently issued Circular No.18/2020/TT-BCT which provides regulations on the development of solar power projects to guide the prime minister's Decision No.13/2020/QĐ-TTg issued in April on the incentive mechanism for solar power development in Vietnam.

Is solar power a viable option for Vietnam?

Solar power generation is an increasingly attractive option for Vietnam thanks to recent cost reductions, fast construction timelines, and the contribution solar power can make to ensuring energy security and environmental sustainability.

Will Vietnam's rooftop solar sector get a major investment boost?

The Vietnam rooftop solar sector is set for a major investment boost with a new draft decree published in early October 2024.

How can the government of Vietnam recover the cost of solar park?

The Government of Vietnam can recover the cost of development, investment, and maintenance of common infrastructure and land through (i) a yearly solar park fee paid by the IPP for the term of the PPA or (ii) receiving a monetary sum by means of leasing the right to use the solar park infrastructure through a lease agreement.

Do rooftop solar developments need to register with electricity of Vietnam (EVN)?

Rooftop solar developments with a 1MW capacity or less (AC capacity) or a 1.25MWp capacity or less (DC capacity) must nevertheless register their proposed connection with Electricity of Vietnam (EVN), including details of location for installation, output scale, and proposed connection point.

How does the solar park scheme work in Vietnam?

Under the solar park scheme, the Government of Vietnam will need to identify the land and acquire selected permits prior to the selection of the winning IPP. However, this time is regained after PPA signature as the IPP does not need to do those steps and usually COD is reached within 12 months after IPP selection under the solar park scheme.

State-owned Vietnam Electricity (EVN), the nation's sole power distributor, may purchase excess rooftop solar power from homes and offices at VND671 (2.6 cents) per kWh. A proposal to this effect has been made by the ...

Circular 18 introduces updated template power purchase agreements (PPA) as well as revised regulations for the development of grid-connected solar farms and rooftop solar power systems. Despite rapid growth and significant investment potential, the Vietnamese renewable energy market and the associated regulatory

regime remains highly complex ...

solar power projects in Vietnam. The Draft New Circular includes revised draft templates for solar power purchase agreements ("Draft New PPA"): one for grid-connected solar farms and ...

State-owned Vietnam Electricity (EVN), the nation's sole power distributor, may purchase excess rooftop solar power from homes and offices at VND671 (2.6 cents) per kWh. A proposal to this effect has been made by the Ministry of Industry and Trade (MoIT) at the request of Deputy Prime Minister Tran Hong Ha, who'd asked for a scheme to buy ...

**Loan support:** The State Bank of Vietnam has issued many loan support policies for households, organizations, and businesses installing rooftop solar power systems. To install a rooftop solar power system, users need to pay attention to the following issues:

Decision 13 applies to organizations and individuals participating in developing solar energy in Vietnam, including Grid-connected solar power projects and Rooftop solar power systems, with incentives mainly involving in electricity ...

The initial decree proposes three key incentive measures: exemption of rooftop solar panel installation from strict adherence to the 8th National Power Development Plan, authorization for connection of rooftop power sources to the national grid in cases of excess capacity, and provision of interest rate support for loans utilized for storage ...

solar power projects in Vietnam. The Draft New Circular includes revised draft templates for solar power purchase agreements ("Draft New PPA"): one for grid-connected solar farms and another for grid-connected rooftop solar systems. However, compared to the current solar PPA templates, the Draft New Circular makes some minor updates and

Decision 13 applies to organizations and individuals participating in developing solar energy in Vietnam, including Grid-connected solar power projects and Rooftop solar power systems, with incentives mainly involving in electricity prices.

Vietnam could pilot competitive bidding in 2020/2021 through three different schemes totaling 1.2 GW: (i) 500 MW substation-based competitive bidding; (ii) 200 MW floating solar parks; and (iii) 500 MW ground-mounted so-lar parks. After the pilot phase, 1-2 GW of capacity should be installed every year using a mix of substation-based

Leasing and power purchasing agreements (PPAs) allow homeowners to install solar panels without initial investment, with investors financing the installation through lease payments or energy sales. Investors can fund companies offering solar leasing options, community solar initiatives, or PPA-based solar models.

## Vietnam solar installmental payment

The Vietnam rooftop solar sector is set for a major boost with a new draft decree published in early October 2024, introducing fresh policy guidelines to promote self-produced and self-consumed solar energy.
