

HANOI: Vietnam's national power grid operator EVN plans to buy excess power generated by solar panels on homes and offices to feed into its own supply, state media reported on Friday.

Vietnam's abundant sunshine makes solar power a highly attractive renewable energy source. Here are some key benefits of switching to solar energy: Reduced Electricity Bills: Solar panels significantly reduce your reliance on the grid, leading to ...

A grid-tied solar power system helps households: Sell electricity to EVN at the price of UScent 8.38/kWh (at the current exchange rate of VND 1,940/kWh) within 20 years. With an investment for this system of about 13-16 million VND/1kWp (depending on the installation location and roof structure), the payback period only takes about 4-5 years.

The recent draft Decree on rooftop solar power in Vietnam marks a significant step towards enhancing the nation's renewable energy landscape. By promoting self-produced and self-consumed solar systems, the Government is facilitating investment opportunities for foreign entities while supporting its ambitious goal of achieving net-zero carbon ...

Growing Need for Energy Resilience and Backup Power: HES systems provide critical backup power during grid outages, ensuring reliable access to electricity. In VIETNAM, demand for home energy storage is rising as consumers prioritize energy resilience, particularly in areas prone to blackouts or unreliable grid service.

The Government has recently introduced Decree No. 135/2024/ND-CP, effective October 22, 2024, to promote the development of rooftop solar power systems for self-production and self-consumption. This decree outlines mechanisms and policies aimed at encouraging various sectors, including residential, commercial, and industrial facilities, to ...

Grid-tied solar power systems add batteries as a backup source of electricity to balance production and demand and to safeguard against power outages. This is accomplished by using excess power to charge the batteries and ...

Solar Panels System for Home and Industry in Vietnam. This article dives into the world of solar power systems in Vietnam, exploring the benefits, costs, installation process, and the government's role in this clean ...
