

ViZn Energy is working with our international partners to deploy our energy storage systems globally. We leverage local relationships and expertise to rapidly expand the sales, distribution, installation and service of our innovative technology, and we ensure the success of each project.

ViZn Energy Systems, founded in 2009, is a leading provider of 128kW/320kWh energy storage solutions (INL) for various applications.

Founded in 2009, ViZn Energy Systems is comprised of a dedicated and passionate team of scientists, engineers, and business leaders who have been working for more than 8 years to commercialize a revolutionary energy storage solution.

ViZn Energy's core technology, chemistry and robust packaging is the result of more than 8 years of engineering and R& D into the most promising energy storage technology available. Our value lies in our ability to simultaneously deliver high-power and long-duration energy services.

Take the example of ViZn Energy Systems, a startup with a zinc-iron flow battery it's now putting to the test in grid-scale applications. For the past four years, ViZn (pronounced "vision") has been busy turning a fundamental weakness of its alkaline electrolyte into a strength.

Vizn energy Japan

ViZn Energy Systems offers an energy storage solution that is safe, reliable, cost-effective, and versatile enough to meet the needs of today's ever-changing energy landscape. The ViZn battery achieves unique performance blend by utilizing a hybrid flow battery in which alkaline electrochemical components are dissolved in the electrolyte.
