

What is ib vogt?

ib vogt is a leading utility-scale solar development platform with a global footprint and a 20-year track record. Our OECD-focused development strategy, world-scale development pipeline, investments in BESS technology, and independent power producer ("IPP") business model strongly position ib vogt for accelerated near-term growth.

Will ib vogt & nextpower V ESG buy a solar project?

ib vogt and NextPower V ESG have agreed on the sale of a 110 MWp solar project in Segovia, Spain. Construction started in March 2024, with operations set for Q1 2025. The project will generate 215.6 GWh annually, powering 55,000 homes and reducing CO2 emissions by 47,450 tons per year.

What will ib vogt do in the future?

ib vogt has one of the largest pipelines in the world of any solar company. A key objective going forwards is to continue expanding our leading independent power producer ("IPP") model to leverage more business opportunities. We expect major growth in the BESS applications segment.

Why should you choose ib vogt?

With a proven track record of project development success and a long history of profitable growth, ib vogt benefits from its strong local presence, which is augmented by a robust network of joint venture and local development partners, and profits from key relationships with customers, investors, lenders and suppliers.

Who is Carsten Stang from ib vogt?

Mr. Milner is a chemical engineer and holds an MBA from INSEAD. His previous employers include Shell and McKinsey & Co. Carsten Stang joined ib vogt in 2016 and is responsible for the company wide Business Development activities and regional organisations. Before Carsten joined ib vogt he held positions at Solarhybrid AG and ReneSola Ltd.

International solar developer ib vogt has sold a 122 MWp solar photovoltaic project in Brandenburg, Germany to Octopus Energy Generation. The development of the plant, which is one of the largest solar parks in Germany, marks ib vogt's return to the German market.

Far from being a sun-drenched country, Germany has one of the highest solar power outputs in the world and boasts cutting-edge research. The government's aim to largely base electricity production on renewables is expected to give the technology a major push.

German family-owned solar power company ib vogt GmbH has sold a 206-MWp solar project in southwest Finland to Helsinki-based energy utility Helen, a statement said. Solar panels by iAmmee Ubeyou. The ready-to-build solar photovoltaic (PV) scheme is located in Kalanti, Uusikaupunki and is expected to generate
