

The WAVJA Photon Energy System is supposed to generate up to 60x the output of regular solar panels using balls made of magical patented woo-woo material. Let's examine claim with Dave's superior Photon Irradiance ...

A company called WAVJA wants you to think of spheres. The little spheres, ranging from one to four inches across, can convert light into electricity, and the company claims they have 7.5 times...

Tech company WAVJA has introduced a new era in renewable energy with their Photon Energy System. These tiny spheres, capable of capturing both sunlight and artificial light, are poised to surpass traditional ...

According to Wavja, each sphere achieves outputs 7.5 times greater than solar panels while being 200 times more efficient. Moreover, they are 30 times smaller than conventional solar panels. To contrast performance, the ...

Amplifying power output by an astonishing 20 times compared to conventional solar panels, and is being tested and developed to reach up to 100 times. The use of distributed modules in PES makes it easy and flexible to plan according ...
