

# What can be changed in a one square meter locker

How much space do you need for a locker?

But if your lockers are just for staff to store their belongings during their shift, 1.2m should be enough space for lockers that are face-to-face. Once you have decided on how best to use the space available to you, it is then necessary to establish what size of locker compartment would be suitable.

How big are our lockers?

Our lockers are surprisingly big. At 1M X 1M X 1M, they are a massive 1,000 Litres in cubic capacity. Please look at our scaled comparison image below to see the relative volume. This shows how our locker compares with many common every day items. Great little storage spaces for so many important items.

What makes a perfect locker layout?

The key to a perfect layout is to achieve a balance of comfort and usability whilst optimising your available space. So, the first requirement is to establish the number of users and available space allocated for the lockers.

How tall is a locker unit?

Each locker unit's height depends on how many tiers the lockers have - a 1-tier locker has one 6-foot-high locker, a 2-tier locker has two 3-foot-high lockers, a 3-tier locker has three 2-foot-high lockers, a 4-tier locker has four 1-foot and 2-inches-high lockers, a 5-tier locker has five 1-foot-high lockers.

How to plan a locker room layout?

Maximum utilization of your locker room space WITHOUT jeopardizing comfort and usability is the main goal when planning your locker room layout. You need to ensure that there is a proper flow of traffic and the lockers and seating do not prevent your patrons from easily getting around the locker room.
