

# Wind farm spare parts maintenance

What is a wind turbine repair & spare parts service?

Industry-leading repair and spare parts services to keep turbines spinning and costs at a minimum. We've made it our goal to streamline access to spare parts and repair solutions for your wind turbine fleet.

Why do wind turbine owners need spare parts procurement?

Wind turbine owners are increasingly deciding to take charge of and manage the maintenance of their wind farms. This makes managing purchase of spare parts procurement crucial. G2WIND was founded in 2011 to meet these needs and facilitate alternatives to wind turbine manufacturers.

Which brands of wind turbine spare parts are available?

At G2Wind we work with the main brands for wind turbine spare parts, including Gamesa, Ecotecnica and Vestas, among others. We stock a wide variety of parts for wind turbines, covering both consumables and all types of spare parts. The best consumables for wind turbines are waiting for you here at G2Wind.

How can I find onshore wind spare parts?

By using our website you can access our full catalog of Onshore Wind spare parts, check prices and order them anytime for North America. You can also use the different tools in the portal to help you identify the right product to keep your turbines running smoothly. Key features include:

What is effective wind turbine maintenance?

Effective wind turbine maintenance involves a combination of preventive, predictive, and corrective measures, tailored to the specific needs of each wind turbine. Gaining a thorough understanding of wind turbine components is crucial for carrying out these tasks effectively.

Do you need a partner to service your wind turbines?

When it comes to servicing your wind turbines, you need a partner you can trust. Someone with enough experience and analytical expertise to alert you ahead of time that a critical component needs replacement. Who you can consult when evaluating whether to go with that new or reconditioned spare part.
